CIRCUIT MANAGEMENT SOURCE SELECTION RECOMMENDATION

Decision Statement: As Chairperson of the Technical Evaluation Panel (TEP) for this source selection, the TEP and I have determined the services proposed by SAIC provide the best overall value to satisfy our Circuit Management requirements. This selection was made based upon the factors and sub-factors established in the solicitation and our integrated assessment and comparison of the strengths, weaknesses, and deficiencies of the proposals submitted in response to the solicitation.

Description of Services: Contractor will provide support services to provide coordination, provisioning, validation & reporting and maintenance on worldwide Military Health Systems communications circuits.

Basis for award: Proposals were measured against the factors listed below with equal importance:

- Technical Approach
- Experience
- Quality Control
- Past Performance

Contractors in Competitive Range: Apttis and Science Applications International Corporation (SAIC)

Summary: The proposal submitted by SAIC was technically superior, very complete in all aspects of their approach to the statement of work and provided a level of detail clearly demonstrating the organization's understanding and expertise in the area of Circuit Management.
