RGII, by thoroughly understanding our customers' unique requirements and partnering with them, we have both achieved great satisfaction.

RGII creates an environment in which our skills can enrich opportunities by stimulating and broadening personal, intellectual, and cultural growth within our organization and our customers.

— Ken Kmiec

VP, Information Management Solutions

RGII's Project Management is an integral piece of every program. Our highly experienced cadre of professionals take a fresh look at new or existing programs and ensure a *successful and cost effective* outcome.

RGII's Diversity means that we understand that agencies may define program management differently, but RGII has the *subject matter expertise* to respond no matter what type of system needs to be managed: a health system, transportation system, or weapons system.

RGII's Staffing Plan includes personnel who have a demonstrated expertise in the required disciplines and experience in working with and supporting the client's managers.

RGII's Experience and Vision enables us to *anticipate requirements* and propel programs in the right direction.

RGII's Management of the Entire Life Cycle Process, provides all the program elements to operate *smoothly and efficiently, on-time, and within budget*.

RGII's Management Process incorporates a complete framework of contract traceability, quality assurance and controls (peer reviews) and best client partnership practices.

RGII's Considerable Experience, Technical Competence, and Understanding of the intricacies of a product—from the design phase—through budget and administration—to engineering and field evaluation; results in *superior products and successful projects*.

RGII's Deliverables meet ISO 9001:2000 and CMM Level 2 standards.

RGII Supports All Areas of Logistics for Our Customers, including a complete range of "*cradle to grave*" integrated Integrated Logistics Support (ILS) functional capabilities.

RGII Provides Business Strategic Planning for: Acquisitions, Test and Evaluation, Configuration Management, Integrated Logistics Support, Systems Engineering Management, Risk Management, and Training.
